

TAKE CHARGE OF YOUR SEWER CHARGES

All customers are reminded that beginning **November 16, 2010**, through **April 13, 2011**, your average water usage will determine your sewer rates for the next twelve months.

NOT YET ON SEWER?

If you live in the current construction area, the water you are using **NOW** determines your sewer rate as soon as you are connected.

PAST DUE AMOUNT \$0.00
TOTAL AMOUNT DUE \$85.20

If past due balance is not paid immediately, service is subject to disconnection.

WATER CONSUMPTION HISTORY

SPECIAL MESSAGE

The monthly sewer charge is determined by water used from now through April 13. The 3 lowest months are used to calculate your monthly sewer charge for the next 12 months. This average is re-calculated every year.

You can find your water usage (in cubic feet) here. This is the piece you can control.

CUBIC FEET OF WATER

SEWER CHARGE

3,000	=	\$219.00
1,400	=	\$102.22
700	=	\$ 51.11*
562	=	\$ 41.00**

* A two person household utilizing conservation (with a pool, water softener, and desert landscaping) could have a winter quarter average usage of 700 cubic feet of water.

**This is the MINIMUM sewer charge.

REMEMBER: Water, trash, and applicable taxes are not included in this amount.

For more information log on to our website: www.lhcaz.gov

HOUSEHOLD TIPS TO CONSERVE WATER

OUTSIDE

Irrigation

- ✓ Check irrigation system for leaks, breaks, etc.
- ✓ Watering once per week in the winter is usually okay
- ✓ Direct swamp cooler water drain lines to landscaping

Pool

- ✓ Use a pool cover to cut down evaporation
- ✓ Check automatic fillers for proper operation

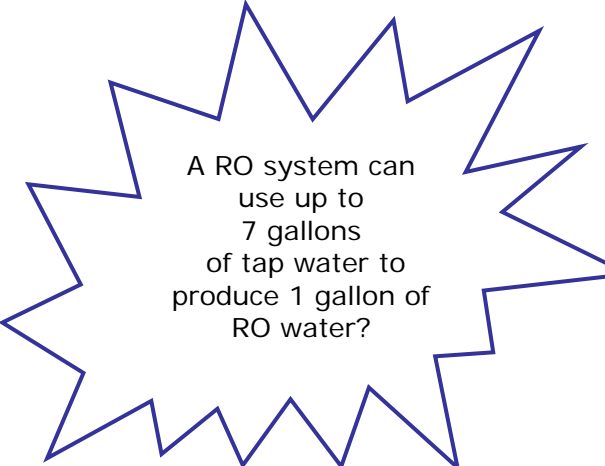

Evaporative Cooler

- ✓ Make sure the water flow valve is set properly and works
- ✓ Turn off feed lines when winterizing the cooling unit

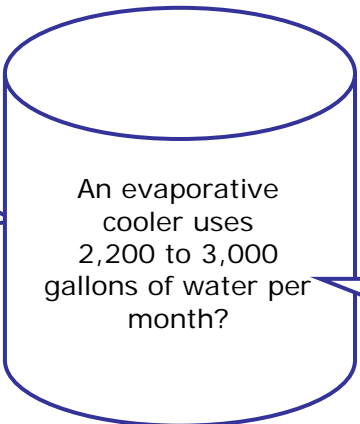

INSIDE

- ✓ Check all fixtures and toilets for leaks
- ✓ Don't let water run while brushing teeth or shaving
- ✓ Hand wash dishes and do not let water run for rinsing
- ✓ If using dishwasher, make sure loads are full
- ✓ Wash clothes in full loads
- ✓ Catch water in shower or sink while water heats up to use on plants

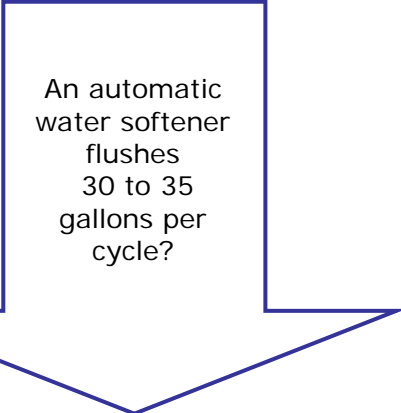

DID YOU KNOW?

A RO system can use up to 7 gallons of tap water to produce 1 gallon of RO water?

An evaporative cooler uses 2,200 to 3,000 gallons of water per month?

An automatic water softener flushes 30 to 35 gallons per cycle?
