FOR IMMEDIATE RELEASE

November 20, 2009

Solar-Powered Flasher Crosswalk System to be Installed

The Lake Havasu City Transportation Division – Street Section crews will begin installing a Solar-Powered Flasher Crosswalk Warning System on McCulloch Boulevard on the west side of the London Bridge on Monday, November 23, which will be operational by Wednesday, November 25. The solar-powered lights will alert drivers that pedestrians are about to enter the crosswalk. State law requires motorists to stop for pedestrians within duly marked crosswalks. Pedestrians should continue to use caution when crossing a street within a crosswalk and never rely on any type of signalization to insure that motorists will always see or stop for them. These caution lights should only be considered another layer of security to alert drivers; however, pedestrians must always look both ways when crossing a street and allow a large enough gap between traffic before crossing. As always, the public is advised to use caution and obey all traffic signs when traveling through construction zones.
