FOR IMMEDIATE RELEASE

April 5, 2012

### **Annual Street Sealing Program Scheduled To Begin**

The Lake Havasu City Operations Department has announced that the 2011-2012 Chip Seal Program is scheduled to start April 14, 2012, and will take approximately three weeks to complete, depending on weather conditions. This chip seal project is part of the Department's annual pavement preservation program and consists of placing approximately 380,000 square yards of polymer-modified chip seal surface on approximately 15 miles of streets in various portions of the city. The chip sealing process is an efficient and cost effective method of prolonging the useable service life of asphalt pavement.

Residents and businesses located along streets where chip seal is scheduled to be applied will receive a detailed door hanger notice in advance of the construction and again 24 hours prior to the work starting. The application of the material will occur on one side of the street at a time and the remaining side will be completed the next day. The City asks that residents refrain from parking on the streets and to remove all vehicles from the streets during the time that they are scheduled to be sealed, and to avoid letting running water into the street during this time.

The Operations Department is asking for resident's patience and cooperation during the street sealing process. Motorists traveling on a street being chip sealed can expect delays due to street sealing activities and possible flagging to direct traffic flow. Traffic cones, arrows, and other devices will delineate travel lanes; however, motorists can expect some lane and access restrictions and it is recommended that motorists use alternate routes whenever possible.

As always, the public is requested to use caution and obey all traffic signs when traveling through construction zones. To view a map of the roadways scheduled for the proposed work, go to the Lake Havasu City website at [www.lhcaz.gov](http://www.lhcaz.gov) and use Quick Links to Operations Department, Transportation Division.
