**INVITATION TO BID  
NEW LABORATORY BUILDING  
PROJECT NO. B25-PW-107032-500638  
ADDENDUM NO. 3  
MAY 22, 2025**

Attention is called to the following changes, additions, clarifications and/or deletions to the original solicitation and they shall be considered in preparing submissions:

There is no change in the opening date. **Submissions are due no later than 3:00 p.m., Arizona Time, JUNE 4, 2025**, at the City Clerk's Office, 2330 McCulloch Blvd. N., Lake Havasu City, AZ 86403 or electronically via DemandStar.

**ITEM ONE(1): QUESTIONS AND ANSWERS**

The following questions have been received to date and answers are provided herein:

**Question 1:** The ceiling assembly calls for R-5 closed cell. For proper adhesion, requirement and installation application, we would need to use 1 inch minimum which is R-7. Please advise?

**Answer 1:** R-5 is the code minimum address in table 1202.3 of the 2018 IBC for climate zone 3. 1 Inch R-7 is acceptable.

**Question 2:** The plans call for R-33 batts for the ceiling assembly. We will be quoting R-38. Is this acceptable?

**Answer 2:** R-38 (total) is the code minimum for attics in climate zone 3. This is why R-33 batts are indicated on the Roof/Ceiling assembly details, sheet G006. R-33 batts + R-5 spray foam leads to a R-38 total. However, R-38 batts are acceptable.

**Question 3:** Where plans call for 2x6 metal stud walls, is it acceptable to use R-19 to fill any cavities?

**Answer 3:** Yes, R-19 is acceptable.

**Question 4:** Where the plans call for 2x8 metal stud walls, is it acceptable to use the double application of R-19 + R-13 to fill those cavities?

**Answer 4:** Yes, using both R-19 and R-13 to fill the cavities of those walls is acceptable.

**ADDENDUM 3 – B25-PW-107032-500638 NEW LABORATORY BUILDING**

**Question 5:** The walls adjacent to the mechanical room are not labeled. Are these 2x4 metal stud walls receiving insulation?

**Answer 5:** Yes. The walls between OFFICE 113 / MECHANICAL 112 and MECHANICAL 112 / CONFERENCE 111 are wall type C2.

**ITEM TWO (2): REVSED ARCHITECTUAL PLANS**

Revised architectural plans have been provided (Attachment A).

**ITEM THREE (3): REVISED BID SCHEDULE**

Due to the addition of a new line item, pages 2 and 3 of Section 00310 of the solicitation package are being replaced (see Attachment B).

**ITEM FOUR (4): REVISED SECTION 01210**

Due to the addition of a line item to the Bid Schedule, Section 01210 of the solicitation package has been replaced in its entirety (see Attachment C).

## **SECTION 01210**

### **MEASUREMENT AND PAYMENT**

#### **PART 1 - GENERAL**

##### **1.1 Description**

The outline of measurement and payment in this section is intended to provide a general guideline to the Contractor in preparing bids and submitting pay requests. Listing of work included in each bid item is not intended to include all work, but is to provide general guidance to the Contractor for allocating costs. All work will be paid for on a unit price basis with payment made for the quantity of each item completed.

All materials required for construction shall be furnished by the Contractor unless specifically stated. Items not specifically measured and paid for shall be considered as subsidiary items required to complete the installation in accordance with the intent of the contract documents. The Contractor shall include in the unit price bid items, all costs associated with subsidiary items not being measured for payment.

##### **1.2 Authority**

Measurement methods delineated in the individual specification sections complement the criteria of this section. In the event of conflict, the requirements of the individual specification section govern.

Take all measurements and compute quantities. The Engineer will verify measurements and quantities.

##### **1.3 Unit Quantities**

Quantities indicated in the Bid Form are for bidding and contract purpose only. Quantities and measurements supplied or placed in the Work and verified by the Engineer shall determine payment.

If the actual Work requires more or fewer quantities than indicated, provide the required quantities at the unit prices contracted.

## **PART 2 – UNITS AND METHODS OF MEASUREMENT**

### **2.1 General**

All items that are included in the bid for measurement and payment are included herein. All other items of work shall be considered subsidiary to construction and will not be measured for payment.

### **2.2 Units and Methods of Measurement**

#### **2.2.1 Mobilization, Bonds, and Insurance**

The Contract Lump Sum Price for this item shall constitute full compensation for furnishing all materials, labor, equipment and tools for all required bonds, insurance, mobilization of staff and equipment, and any other costs associated with complying with the contract administrative requirements and commencing work at the project site. This item also includes all work and materials necessary to complete the work as described in the plans and specifications. **Payment for this item shall be lump sum and shall not be requested until at least thirty days from the notice to proceed has elapsed.**

Payment for this item shall be made in accordance with Table A.

TABLE A

Payment for Mobilization on First Partial Payment	Not to exceed 2.5% of the Lump Sum Base Bid
Subsequent payments for Mobilization	Not to exceed 2.5% of the Lump Sum Base Bid
