[1] Lot width times depth must equal or exceed minimum lot area. [2] Garages, carports, or any structure used to park vehicles that face a front yard right-of-way must be set back a minimum of 25 feet. On a reverse corner lot, the front yard is defined by the shorter of the two street frontages, but a 25-foot garage setback is required from any "front" or "side" street right-of-way that the lot's parking structure faces. [3] A lot with an average depth of 100 feet or less may maintain a 20-foot front yard setback for a garage. [4] A lot with an average width of 80 feet or less may have a side yard of 5 feet, or 10 feet if it is a corner lot. [5] If a garage is to be accessed from a corner lot with a street side setback, the minimum setback for the garage shall be 20 feet, regardless of the minimum setback identified in this table. [6] Detached accessory structures may be built within 5 feet of the side and rear property lines. [7] Accessory buildings are limited to garages and must be located in the rear of the primary structure. Garages may not face the street. [8] A property developed with one Single-Family or one Two-Family unit shall use the R-3 Building Setback Standards [9] See Section 14.02.03.H.4 for minimum building story requirements [10] See Section 14.02.03.I.4 for minimum building story requirements
