## MEMORANDUM

**To:** Honorable Mayor Nexsen and City Council Members

**From:** Charlie Cassens, City Manager  
Valerie Fenske, Administrative Services Director

**Subject:** Fiscal Year 2014-15 Mid-Term Biennial Budget Update

---

### Budget Message

This document provides updated budget information for fiscal year 2014-15 which is the second year of the fiscal year 2014 and 2015 biennial budget, of which fiscal year 2014 was adopted and fiscal year 2015 was approved by City Council in June 2013. The updated fiscal year 2014-15 information reflects adjustments based on staff's assessment prior to beginning the second year of the biennial budget, which was officially adopted by City Council in June 2014. The fiscal year 2014 and 2015 biennial budget can be viewed at [www.lhcaz.gov](http://www.lhcaz.gov) under "Publications and Brochures."

Included in the fiscal year 2014-15 approved budget is an amount equivalent to a 5 percent adjustment to wages and salaries on July 1, 2014. This is intended to address one of the priorities identified during the January 2014 Council Retreat.

As begun in fiscal year 2012-13, annual contingency appropriation of \$750,000 is included which exceeds historical spending and allows for unplanned occurrences. The use of contingency funds is allowed only with City Council approval. During fiscal year 2013-14 City Council approved the use of contingency funds in the amount of \$216,040 to enter into a contract for General Plan revisions. A general definition of contingency is when funds are appropriated as a backstop against circumstances that were unforeseen for various reasons. It is appropriate to draw on these funds to cover shortfalls that were unanticipated such as repairs or replacement of key operational items or equipment, or to meet workload demand.

A General Fund balance exceeding \$11 million is targeted in each of the next five years, demonstrating a positive long-range financial perspective. A General Fund balance that exceeds \$11 million is healthy by many standards, including both the 90 and 120 days operating cash test.

Using this long-term approach to financial planning enables the City to realize the cost-saving benefits of the city-wide reorganization over time and allows the necessary time for the asset management program to be fully implemented and refined.

Like any plan, the proposed operating budget for fiscal year 2014-15 is a guide and best estimate and is supported by projected revenue streams. The City is committed to continuously examining its service delivery methods and the means to analyze, pay for, and prioritize its needs.

Authorized positions citywide are proposed to be 438, which is a reduction of 4 positions from what had been previously anticipated in the fiscal year 2014-15 approved budget. This level of authorized positions reflects a 19 percent reduction in staffing from a peak of 539 positions in fiscal year 2008-09, and is a good indicator of efficiencies that have been put in place without measurable reduction in service levels. The most significant change in staffing levels was a reduction of 9 positions in the Transit Fund. The fiscal year 2014-15 adopted budget reflects elimination of the Transit Fund, replaced with the Havasu Mobility division within the General Fund operated with part-time staff. Detail of the changes in staffing levels can be found in the Schedule of Authorized Positions under the Personnel Schedules Section.

### Operating Budget Highlights

Following are major policy decisions and considerations contained in the fiscal year 2014-15 adopted operating budget:

- Implement salary increases for employees
- ASRS employer contribution rate of 11.60 percent compared to 12.54 percent included in the fiscal year 2014-15 approved budget, a decrease of 7.50 percent
- PSPRS (Fire) employer contribution rate of 32.26 percent compared to 33.90 percent included in the fiscal year 2014-15 approved budget, a decrease of 4.84 percent
- PSPRS (Police) employer contribution rate of 34.70 percent compared to 34.29 percent included in the fiscal year 2014-15 approved budget, an increase of 1.20 percent

The following represents the breakdown of expenses by category compared to the fiscal year 2013-14 adopted and fiscal year 2014-15 approved budgets:

TOTAL FINANCIAL PROGRAM	FY 13-14		FY 14-15		FY 14-15	
	ADOPTED BUDGET	% OF BUDGET	ADOPTED BUDGET	% OF BUDGET	ADOPTED BUDGET	% OF BUDGET

<b>TOTAL ALL FUNDS</b>	<b>\$144,284,931</b>	<b>100%</b>	<b>\$131,562,974</b>	<b>100%</b>	<b>\$149,165,287</b>	<b>100%</b>

The fiscal year 2014-15 adopted operating budget for all funds totals \$76,054,440. This represents an increase of \$2,131,374 or 2.88 percent over the fiscal year 2014-15 approved operating budget of \$73,923,066. Debt service, depreciation, and contingencies adopted for fiscal year 2014-15 total \$39,953,377.

The adopted budget for fiscal year 2014-15 reflects state shared revenue increases of \$409,982 or 3.1 percent over the fiscal year 2014-15 approved budget. City sales tax, the largest single revenue source for the General Fund, is expected to end fiscal year 2013-14 at \$14,389,449 (net of developer agreements), which is 5.38 percent over the fiscal year 2013-14 adopted budget. The fiscal year 2014-15 adopted budget reflects a conservative increase of 4.39 percent in sales tax revenue (net of developer agreements) over the amount included in the fiscal year 2014-15 approved budget.

Lake Havasu City is committed to funding the Partnership for Economic Development (PED) and the Convention and Visitors Bureau (CVB) using proceeds from the hotel/motel and restaurant and bar tax. The City will continue to distribute funds based on actual collections of these taxes to the CVB and PED on a 75 percent / 25 percent ratio, respectively.

### Community Investment Program

The fiscal year 2014-15 adopted Community Investment Program (CIP) budget is \$28,758,827 compared to the fiscal year 2014-15 approved budget of \$10,909,273, with water, drainage, and general government projects making up the majority of the projected expenditures. The following illustrates a breakdown of CIP projects by program:

### Summary/Conclusion

In summary, the fiscal year 2014-15 adopted budget represents a great deal of planning and effort. The result is a spending plan that is contingent on available revenues. The City is committed to keeping its cost of providing essential public services within the most reliable revenue streams and continuing

to rely on innovation and planning to accomplish this objective. Increasing the ability to sustain City operations in the current economic environment will take creativity, innovation, enhanced technology, outsourcing, and a great deal of perseverance. Special thanks to all of the dedicated people of this organization, along with the department heads for their cooperative efforts in developing this budget, and to the Mayor and City Council for giving us the opportunity to help lead this fine organization.

**Description** **Total Project Cost:** \$199,808  
Two level parking structure to be constructed on City owned parcels located at 2140/2160 Mesquite Ave. The amount in FY 14 is for grading/prep work and master plan design to the property.

**Justification**  
Implements General Plan goals and policies for the redevelopment of the Uptown McCulloch area and implements suggestions from the R/UDAT update. The uptown area, via the new UMS District will redevelop to include mixed uses. The long term goal is to substantially reduce parking on McCulloch Blvd. The creation of a public parking structure will allow public parking on McCulloch to exist in a manner that will not detract from the mixed use/pedestrian atmosphere that is envisioned.

**Useful Life** 10 Years      **Contact** Deputy City Manager  
**Category** Asset Management      **Priority** 1 Essential (Start 1 yr)  
**Strategic Action** # II - Infrastructure Assets  
**Project Status** New Project

**Description**

**Total Project Cost:** \$915,000

Asset analysis driven repairs/rehabilitation. This action represents continued implementation of the Asset Management Program. To date, computer software has been purchased for the entire City organization and fully implemented in the Wastewater Division. The Wastewater Division is using the Lucity software in creation of its operation budget. In the next budget year, the goal is to have Maintenance Services implement the Lucity software. Prior to this, certain proactive basic maintenance activities cannot be delayed. As detailed inspections are conducted during the inventory of facility assets and population of the Lucity program, additional maintenance activities specific to individual structures will be accomplished.

**Justification**

Council has identified protection of existing public assets as a top priority and established a funding source in support of the importance of his endeavor. To this end, staff has been implementing an Asset Management Program, with the Wastewater Division being the first to fully integrate the new software into its budgeting process. The extension of the life of and reduction of major maintenance repairs of our public assets by appropriate annual expenditure of funding on proactive maintenance activities represents a long term reduction in costs and a benefit to the community. The long term investment in existing public assets is a sound fiscal policy that is cost effective and efficient. While absolute dollar savings cannot be established at this time, it is universally accepted that funding expended to extend the lifecycle and reduce major repairs to a community's assets is a good investment of public funds.

**Description**

**Total Project Cost:** \$1,420,704

This project is for the acquisition of 9 acres adjacent to the southern-most portion of Rotary Community Park, for the expansion of Rotary Park. The estimated cost is \$150,000 per acre. There will also be a State Land Application Fee and appraisal of approximately \$3000, and a plat map development, deed creation, and title company fee of approximately \$4000.

**Justification**

This project will serve as an extension of Rotary Community Park to ensure public shoreline access to residents and visitors. Proposed amenities will enhance the value of Rotary Park and will enable the City to accommodate larger events. This purchase conforms to the recommendations of the Shoreline Access Committee, which listed this as the number one priority in the purchase of shoreline.

**Project Name** Site Six Redevelopment Program

**Useful Life** 20 Years      **Contact** Deputy City Manager  
**Category** Parks - Community Facilities      **Priority** 1 Essential (Start 1 yr)  
**Strategic Action** # II - Infrastructure Assets  
**Project Status** New Project

**Description** **Total Project Cost:** \$100,000  
Site Six is an underutilized public asset in need of redevelopment. This funding request for FY 14/15 will allow for a redevelopment plan to be created that respects future fiscal funding restrictions, the unique and limited land area and development patterns, and will include an extensive public input element. The final product will be the initial redevelopment plan for submittal to the City Council for approval. If there is funding remaining after the planning effort is concluded, that funding will be used to start demolition efforts to enhance the area until full redevelopment, pursuant to the adopted plan, can be funded in a future budget year.

**Justification**  
Site Six is underperforming as a public asset. By upgrading the facilities as determined via a public outreach program, Site Six will be better positioned to meet the needs of the boating community including visitors and locals. Improvements can make Site Six a destination venue that will bring an additional number of boaters, water based events, and tourist dollars to the community. This will also be a valued amenity to the residents.

**Useful Life** 10 Years      **Contact** Operations Director  
**Category** Parks - Comm/Regional Parks      **Priority** 2 Necessary (Start 1-3 yrs)

**Project Status** New Project

**Description** **Total Project Cost:** \$3,065,970  
This construction project will provide transportation access along with water and sewer infrastructure to the new proposed Main Land Launch Facility near Contact Point. The City will construct only the northwest half of the proposed roadway at this time. The remaining second half of the roadway and all other improvements (i.e. multi-use paths, medians, and offsite water improvements) will be constructed by private developers needed. The SR-95 traffic signal is programmed in 2018; however, this may change depending on increased traffic in the future.

**Justification**  
This is Phase I of an overall development plan and once in place it will allow the City to develop the entire 280 acres. It will provide the utility service and access necessary for the Main Land Launch Facility "Contact Point", along with providing the opportunity for private development to occur to the south of this project. This project will spur/accelerate the development of the remaining 280 acres and surrounding area.

**Description** **Total Project Cost:** \$225,000  
This project is for the removal and disposal of the surplus Whelan Road water tank to enhance development of the vacant lot adjacent and east of Whelan Road. This site is a portion of the 17-acres non-aero land use study process (2011 - 2012).

**Justification**  
The Whelan Road Water Tank is surplus. Removal of the water tank will enhance development of adjacent lots for non-aero land use purposes. Eventual redevelopment of this site will generate jobs, tax base, economic development, and reduce city general fund subsidies to the airport. This project is supported by the Airport Master Plan and FAA-ADOT's ACIP project list. This project will benefit the city, region, and increase the quality of life.

**Description** **Total Project Cost:** \$432,160  
This project is for the construction of a new airport electrical vault.

**Justification**  
This project will enhance safety by replacing the existing vault. This project is supported by the Airport Master Plan and FAA-ADOT CIP project list. The electrical vault supports airfield lighting. One replacement airfield generator will be included in this project since the existing unit is beyond design life.

**Description** **Total Project Cost:** \$25,000  
This project is for the assessment and planning for the possible removal of the 17-acre site from Airport Use Only designation to allow for Non-Aero Land Use to provide revenue enhancements to the airport. FAA/BLM action and approvals of selected airport properties for non-aero uses will be required.

**Justification**  
By moving forward with this project, we will be able to diversify and expand airport revenue base to meet City goal of less/no subsidies of airport enterprise fund and increase continued economic development at the northern portion of the City. This project will benefit the City and region and is supported by the Airport Master Plan.

**Category** Airport      **Priority** 1 Essential (Start 1 yr)  
**Strategic Action** # II - Infrastructure Assets  
**Project Status** Ongoing Project

**Description** **Total Project Cost:** \$123,448  
Arizona State Department of Transportation allocated \$1,114,480 for a one-inch overlay for Runway 14/32 at the airport in FY 12-13 of which the city's match was \$111,448. \$12,000 is included in FY 14-15 to cover the city's portion of possible project overages, if necessary. This project is administered through ADOT and will lengthen the life of approximately 287,000 sq ft of airport pavement.

**Justification**  
The last major pavement preservation project at the airport was over ten years ago. Given the harsh environment here as documented by the ADOT pavement study conducted in 2006 and 2010, our airport pavement is rapidly aging. To protect the airport pavement and enhance the life span beyond 20 years, pavement preservation is required. In part, due to this project, additional aero users will be attracted to our airport - a benefit to the City. These projects are supported by the Airport Master Plan.

By leveraging state funding, as well as light maintenance, the city will utilize 90% of other funds to preserve airport-paved surfaces. This will provide businesses, citizens, airlines and military a safe gateway to access our community in a cost effective manner. This project will indirectly generate revenue to airport businesses by attracting new users and maintaining existing tenants. Staff estimates project can be completed on time with funding. Pavement preservation has been deferred until recently. Light assistance will be required from the Administrative Service Department in tracking and requesting grant payments.

<b>Description</b>	<b>Total Project Cost:</b> \$425,000
This project is for the review of the original ramp use, and to evaluate and revise the ramp use for corporate aircraft parking. The project will also define industry standard helicopter landing, parking, take-off area, which meets FAA standards through a study. Design and construction of industry standard helicopter landing, parking, take-off area, and corporate aircraft parking will also be implemented.	

<b>Justification</b>
There is no clearly defined helicopter operating areas or corporate aircraft parking on the airport. To enhance safety, a standard helicopter/corporate aircraft parking areas need to be built on the ramp. This project is supported by the Airport Master Plan and the FAA-ADOT and the CIP project list.

**Description** **Total Project Cost:** \$100,000  
This project is for the design/construction of green hazard airfield markings. In 2010, the initial green hazard airfield markings were placed between Taxiway "A" and North Ramp, and have performed well.

**Justification**  
Given the airport's large area of pavement, some users have taxied their aircraft into areas where they have been damaged. These markings reduce those opportunities, and will enhance the safety of our airport. This project is supported by the Airport Master Plan and the FAA-ADOT ACIP project list. This project will benefit the City and increase the quality of life.

<b>Description</b>	<b>Total Project Cost: \$150,000</b>
This project is for the design, construction and replacement of the existing mountain and WAPA safety obstruction lights for the airport.	

<b>Justification</b>	In 2009, 2010, and 2011, all of the airport safety obstruction lights failed due to outdated technology and remote locations. Given these improvements were funded and placed during the construction of the airport, they are FAA-ADOT eligible for grant funding. These obstruction lights are required for the safe operations of the airport. This project is supported by the Airport Master Plan and the FAA-ADOT ACIP project list. **Description** **Total Project Cost:** \$539,000

This project is to design and construct a new high-speed exit taxiway for runway 32/14 to better accommodate large jet traffic, utilizing the airport runway.

**Justification**

This project will increase the utility of the airport for larger aircraft now using the facility. A-3, the second high-speed taxiway, was designed for a shorter runway prior to the extension of the runway about ten (10) years ago. This old taxiway will be removed as a part of this project. **Project Name** Taxiway Pavement Preservation

**Type** Asset Maintenance      **Department** Airport - Operations  
**Useful Life** 20 Years      **Contact** Operations Director  
**Category** Airport      **Priority** 4 Deferrable (Start 5-10 yrs)  
**Strategic Action** # II - Infrastructure Assets  
**Project Status** New Project

**Description** **Total Project Cost:** \$400,000  
 This project is to lengthen the life span of the airport taxiway pavement via a seal coat, crack seal, and pavement overlay.

**Justification**  
 The last major pavement project at the airport was ten (10) years ago. Given the harsh environment here, the pavement rapidly ages. To protect the pavement and enhance the life span, pavement preservation is required. This project is supported by the Airport Master Plan.

 By leveraging federal and state funding, the city will utilize 95.53% of other funds to preserve airport-paved surfaces. This will provide businesses, citizens, airlines, and military a safe gateway to access our community in a cost effective manner. This project will indirectly generate revenue to airport businesses by attracting new users and maintaining existing tenants. Staff estimates the project can be completed on time with funding. Pavement preservation has been deferred until recently. Light assistance will be required from the Administrative Service Department in tracking and requesting grant payments. Annual sweeping will be performed by existing maintenance staff as a part of regular duties. Approximately \$1,000 of crack sealing supplies may be required ten years, after the project is completed.

**Description** **Total Project Cost:** \$3,258,022  
This project is to provide roadway edge treatment/stabilization to prevent erosion from rain events.

**Justification**  
The City has 428 miles of roadways; only 140 miles are currently widened. Approximately 75 miles of roadway suffer storm damage with normal or heavy rainfall. Storm cleanup requires the City to shift from routine maintenance to cleanup. Roadway edge treatment/stabilization improves drainage, reduces storm damage, reduces cleanup effort, provides a finished look to the roadway and provides area for parking.

**Description** **Total Project Cost: \$80,000**

This project includes construction of eight pickle ball courts in Dick Samp Memorial Park. Construction would include eight courts, perimeter, and court fencing.

**Justification**

Pickle ball is a racquet sport which is played with a net mounted two inches lower than a tennis net. The game combines elements of badminton, tennis, and table tennis and is played with a paddle and a whiffle ball. The game has gained popularity with seniors due to a ball that moves slower than a tennis ball and a court that is one-third the size of a tennis court. The game has gained popularity in Lake Havasu City with the winter visitors and they have requested courts be made available for play.

**Description** **Total Project Cost:** \$360,000  
This project is to increase/improve the restroom facilities at Rotary Community Park. The project is shown as phased. FY 14/15, the construction of a new south area restroom, FY 15/16, the construction of a new north area restroom, and FY 16/17, the rehabilitation of the three existing restrooms.

**Justification**  
Currently, there are two larger restrooms and one small restroom at Rotary Park. These facilities have been in place for many years without upgrading and rehabilitation; as well as no increase to the public facilities at the park, while the number for park users has grown, and the locations of use have changed. Provisions for rehabilitation/reconstruction of the existing facilities, as well as adding new facilities at different locations, is necessary to meet changing demands. The upgrades/rehabilitation will allow the rest rooms to meet peak demands on large holidays and weekend use, as well as the new demand the Tinnell Skate Park has added on the restroom facilities.

**Description** **Total Project Cost: \$150,000**  
 The Council identified athletic field development as a top priority. Anticipated was the partnering with the Lake Havasu School District as a means to minimize construction costs, by adding lights to existing facilities. This project is being expanded to include a study to determine the optimal location for new fields, which could include School District facilities and properties, the type of fields needed, and the number of fields needed to meet demand. The use of the fields at the ASU Campus is growing beyond the ability of the current facilities to accommodate. This study will include alternative locations and reuse of the existing fields in cooperation with ASU's growth demands.

**Justification**  
 The demand for athletic fields continues to grow, and it is appropriate to conduct the necessary studies to determine the appropriate location, type, and number of fields our community will need. The continued growth of the ASU Campus anticipated by 2017 suggests the existing fields at the ASU Campus will be converted to support the growth of the campus, with additional structures and parking.

**Description** **Total Project Cost:** \$52,012  
Lake Havasu City received a grant from the Recreation Trails Program (Arizona State Parks) in the amount of \$52,012 to be used for the renovation and maintenance of trails, waterline extension to the site, restrooms, drinking fountains, and grading. Lake Havasu City is responsible for a match of \$39,602 which will be accomplished via the SARA Park waterline project (WT7380) to be completed in FY 14/15.

**Justification**  
The SARA Park trailhead is a heavily used hiking/biking trail system that is in need of updating and installation of basic amenities such as restrooms and water/drinking fountains. Lake Havasu City received a grant to offset the cost of the improvements. This project will provide design and construction funds. This project will install warranted intersection improvements at major roadway intersections throughout the community.	

<b>Justification</b>	Traffic volumes on major arterials will continue to grow and multi-way stops will not provide the level of service expected by the community. To maintain and improve traffic flow, warranted traffic signals will need to be installed at locations currently controlled by stop signs.

<b>Priority</b>	2 Necessary (Start 1-3 yrs)
<b>Strategic Action</b>	# V - Economic Growth
<b>Project Status</b>	New Project

**Description** **Total Project Cost: \$600,500**

At the 2014 City Council Retreat, the Council identified the Wayfinding sign program, as developed and presented by the Lake Havasu City Convention and Visitors Bureau, as a priority program for the Community. The FY 13/14 operating budget has funding of \$220,000 for this purpose, with no expenditures. The 14/15 approved operating budget has funding of \$400,750. The total amount requested for this project is \$600,500, with offsetting revenue of community donations in the amount of \$81,767. The expenditures are being moved out of the operating budget to the appropriate CIP budget.

**Justification**

The Wayfinding program is intended to extend visitor's stay time in our community, resulting in direct benefits to the community. This program will also promote the new branding for our community.

<b>Expenditures</b>	'14/'15	'15/'16	'16/'17	'17/'18	'18/'19	'19/'20	'20/'21	'21/'22	'22/'23	'23/'24	<b>Total</b>

**Budget Impact/Other**

Increased visitor's stay time will provide a direct economic impact to the visitor/tourist industry for the community. The Lake Havasu City Convention and Visitors Bureau estimates that an additional \$7 to \$10 million in new spending will be generated in our community each year by this program. While actual maintenance costs cannot be identified at this time, it is anticipated that this program will have associated annual maintenance costs of approximately \$30,000 to keep the proposed sign package in the desired condition.

**Project Name** Mulberry Effluent Basin Expansion

**Type** Asset Maintenance      **Department** Wastewater - Operations  
**Useful Life** 40 Years      **Contact** Operations Director  
**Category** Wastewater      **Priority** 1 Essential (Start 1 yr)  
**Strategic Action** # II - Infrastructure Assets  
**Project Status** Revised Project

**Description** **Total Project Cost:** \$1,334,432  
This project will expand or modify the basin and suction line to allow for the Reuse Pump Station to pull sufficient effluent from the Mulberry Wastewater Treatment Plant to supply the reuse force main without draining the basin. This is for irrigation and injection purposes, and a capacity increase to the co-mingling pond and liner repair. Replacements and repairs to the South Intake may also be required. These repairs and replacements required to the South Intake will allow the option of providing water during high demand months and reduce the need for more costly storage.

**Justification**  
This project conforms with the Wastewater Master Plan and the Reclaimed Water Management Study.

This project will extend the useful life of the asset, and will also provide more effective and efficient use of effluent for reuse purposes. Operational impact depends on how the basin and/or pond will be expanded. Options will be defined in the effluent planning study (see project SS2860).

<b>Description</b>	<b>Total Project Cost:</b> \$720,000
This project will replace the existing Vadose Zone Well #2 and #4 with new Vadose Zone Wells #6 & #7, respectively. Vadose Zone Well #7 is being pushed to 2016, due to sufficient available capacity of the existing wells and the anticipated capacity of the new Well #6. This project is necessary for the disposal of effluent from the North Regional Wastewater Treatment Plant.	

<b>Justification</b>
Aquifer Protection Permit requires Vadose Zone Wells for disposal, and the existing wells are panned to have reached their full life expectancy of 7 years by this point.

**Description**

**Total Project Cost:** \$150,000

This project is to perform a geophysical survey for the purpose of locating a recovery well. This survey will be completed in FY 14/15, with the actual construction of the well to follow in FY 15/16. This well will prove whether reclaimed water recovery at the NRWTP is a viable option, and is necessary to maximize the City's efforts converting irrigation potable water demands to effluent reuse. If the survey does not support this type of effluent recovery, the construction costs anticipated in FY 15/16 will be cancelled.

**Justification**

This project concurs with the Reclaimed Water Management Study and the recharge and recovery efforts to store effluent underground by injection for future recovery. Conforms with the Lake Havasu City General Plan, the Wastewater Master Plan, and the Reclaimed Water Management Study.

**Description** **Total Project Cost:** \$171,000  
 This project is to evaluate the complicated hydraulics of the effluent system, and to provide design for the installation and operation of the irrigation system conversions from domestic water to effluent reuse at several parks, a university campus, and at least one public school within the City's water service area.

**Justification**  
 Prior to physically making the connections, (See SS2860) the hydraulics of the system need to be evaluated. Due to the complexity of the hydraulics and operation of the system, this modeling must be taken before design of each individual system connections can be completed. Conforms with the Lake Havasu City General Plan, the Wastewater Master Plan, and Reclaimed Water Management Study.

 The ultimate goal is to reduce the domestic water allocation demands, and when possible, replace the demands with reclaimed water. Exact operational impacts are unknown at this time and may very easily be a wash; however, any savings realized from pumping and treating domestic water for irrigation use will be transferred to wastewater on the effluent system side.

**Description** **Total Project Cost:** \$110,000  
A reclaimed treated wastewater distribution pipeline from the North Regional WWTP to SARA Park is proposed through the Western Area Power Administration easement. This project, through grant funding, provides an opportunity to conduct a cost/benefit and engineering feasibility study for construction of the pipeline, storage options of treated wastewater for distribution, and connecting pipelines to irrigation sites (schools, parks and general landscaping).

**Justification**  
Less water in the Colorado River will lead to federal shortage declarations within the next few years, signaling long term water supply issues concerning the City's annual water allocation. The city can increase its water use efficiency by replacing potable water irrigation at parks, schools and general landscaping with reclaimed treated wastewater. The more treated wastewater that replaces potable water, the less dependent the City is on its Colorado River entitlement. The proposed project will help accomplish that effort.

The proposed feasibility study will determine the cost/benefit savings of an effluent line through the WAPA easement and operation/storage of treated wastewater to supply the irrigation needs. The potential Colorado River water savings is up to 1000 ac-ft/year.

<b>Strategic Action</b> # II - Infrastructure Assets	
<b>Project Status</b> Ongoing Project	

<b>Description</b>	<b>Total Project Cost:</b> \$12,002,220
<p>This project is to replace water mains in various areas throughout the water distribution system on an ongoing basis. There is approximately 400,000 linear feet (75 miles) of a 4 inch diameter water main in the system that cannot meet fire flows and needs upsizing to 6 or 8 inch mains. These 4 inch mains are also at the end of their useful life and have been an ongoing issue for the water division regarding repairs and significant street damage when breaks occur. Also, there are other larger mains in the system in need of upsizing and or replacement.</p>	

<b>Justification</b>	<p>Conforms with Lake Havasu City Water Master Plan.</p>

**Category** Water      **Priority** 1 Essential (Start 1 yr)  
**Strategic Action** # II - Infrastructure Assets  
**Project Status** Ongoing Project

**Description** **Total Project Cost:** \$3,505,946  
This project is to rehabilitate the City's current storage reservoirs on a rotating basis when each reservoir's coating system reaches its life expectancy (12-15 years). Repairs include cleaning, sandblasting, and recoating the structures inside and out. Complete structural repairs and upgrades (ladders, safety devices, etc.) for compliance with the ADEQ and the EPA.

**Justification**  
There are 25 tanks in the system ranging in age from 30 to 50 years old. Between 2000 and 2008, 23 of the 25 tanks had rehabilitation work performed. Coating system life expectancy is 12 to 15 years. In the near future, two tanks will require rehabilitation (BS 5A which is part of the current BS project under construction and the Airport Tank constructed in 2000). All other tanks will need to under go a thorough evaluation and have coating and other maintenance work performed on a rotating schedule.

**Description**

**Total Project Cost:** \$2,149,582

To perform an evaluation of drawdown and capacity testing and development of indicators for proper maintenance for the purpose of rehabilitation work. Currently, one well is out of service and a determination of action is necessary on it. If another collector well site is determined to be feasible and appropriate, this item will be deleted and the new collector well will become the backup for the water system.

**Justification**

The original wells are approaching the end of their life expectancy. Nine (9) wells all constructed in the mid 60s to mid 70s are showing signs of extensive corrosion and developed casing deterioration and are inoperable. Conforms to the 2007 Water Master Plan Update.

**Project Status** Ongoing Project

**Description** **Total Project Cost:** \$251,830  
Since the last firming agreement in 2005, the City has acquired another 3,139 acre-feet of 4th priority water and now has the opportunity to firm these supplies as well. The amount of credits required to firm this supply is 11,992 acre-feet and the total prepayment is \$239,840.

**Justification**  
Firming would allow the City access to approximately 113,000 acre-feet of water stored underground in AWBA facilities during declared Colorado River water shortages.

<b>Useful Life</b>	40 Years	<b>Contact</b>	Operations Director
<b>Category</b>	Water	<b>Priority</b>	1 Essential (Start 1 yr)
<b>Strategic Action</b>	# II - Infrastructure Assets		
<b>Project Status</b>	Ongoing Project		

<b>Description</b>	<b>Total Project Cost:</b> \$1,912,500
Design, planning and construction of Water Booster Station Improvements at Sites 6A will include the land development of the site, construction of storage tank and all equipment necessary to provide an operational pump station(s) and storage facilities. Construction includes, but is not limited to, valves, flow meters, distribution and transmission mains, connections, security, SCADA, electrical, instrumentation, and all necessary appurtenances.	

<b>Justification</b>
These improvements will eliminate closed water systems (pneumatic) currently operating in the area allowing for gravity systems being in place and lowering the costs of water handling. Meets the goals of the 2007 Water Master Plan Update for enhancement of service reliability, system redundancy and lowering of construction costs and O&M in the effected zone boundaries and at Stations 5A.
