

# Residential Outdoor Lighting

The city is receiving reports of outdoor lighting that does not comply with the city code.

Please help us maintain a more pleasant nighttime outdoor experience by observing the following standards:

- All light fixtures that emit more than a total of 375-lumens shall be concealed or shielded to minimize glare and diffusion on adjacent property.
- Soffit or canopy mounted light fixtures shall be recessed in the soffit or otherwise fully shielded.
- Wall mounted lights shall be directed downward and not project over a property line.

Please do your part to maintain an acceptable lighting level that meets the city code by using the appropriate light fixtures. Examples of compliant and non-compliant lights are shown below.

Examples of compliant fixtures:

Examples of non-compliant fixtures if they exceed 375 total lumens:

Thank you for your cooperation and please contact the Lake Havasu City Planning Division at [planninginfo@lhcaz.gov](mailto:planninginfo@lhcaz.gov) or (928) 453-4148 with your outdoor lighting questions.
